Professional Summary

Enthusiastic **Frontend Developer** and Computer Science undergraduate with strong skills in **React.js, JavaScript, and modern web development**. Experienced in building responsive, user-friendly applications with seamless authentication. Passionate about **Data Structures and Algorithms (DSA)**, having solved 40+ problems with focus on optimization and problem-solving. Seeking opportunities to apply technical expertise in real-world projects and deliver impactful solutions.

Education

Vellore Institute of Technology, Andhra Pradesh

Integrated M.Tech in Computer Science
CGPA: 8.29 / 10.0

Krishna Chaitanya Junior College, Nellore

MPC (Intermediate)
Percentage: 90.8%

Rainbow EM High School, Nayudupet

CBSE Board (10th)
Percentage: 79.4%

Projects

Crop Disease Detection and Diagnosis | React.js, REST API, CNN (2025)

- Developed a crop disease detection system using Convolutional Neural Networks to identify plant diseases from leaf images.
- Built a React.js frontend for uploading crop images and displaying diagnosis results with disease details.
- Integrated REST APIs to connect the deep learning model with the web interface for real-time predictions.

Portfolio | React.js (2026)

- Developed a personal portfolio website using React.js to showcase projects, skills, and achievements.
- Implemented responsive UI components, smooth navigation, and modern design principles for better user experience.
- Integrated project sections, contact forms, and GitHub links to highlight development work and technical skills.

CuraPredict : Deep Learning Approach for Predicting Patient Treatment Outcomes | React.js, ANN, REST API (2026)

- Built a healthcare prediction web application that estimates patient treatment outcomes using Artificial Neural Networks.
- Developed a responsive React.js interface to collect medical parameters and display prediction results.
- Integrated REST APIs for model inference and implemented user-friendly visualization of health insights.

Technical Skills

Languages: Java, Python, JavaScript, SQL Server

Frameworks: React.js

Tools: Git, GitHub

Web Development: HTML, CSS

Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)

Achievements

- Developed multiple projects in web development.
- Solved 40+ problems in Data Structures and Algorithms (DSA) with a focus on optimization.
- Frequently tackles DSA problems to improve problem-solving skills.

Additional Skills

- Time Management, Communication Skills, Microsoft Word, PowerPoint, Presentation Skills, English Proficiency
